DUCO

HOME OF OXYGEN

DUCO Ventilation & Sun Control provides every building with a healthy supply of oxygen. With a comprehensive range of innovative natural and mechanical ventilation systems, either combined with external solar shading or otherwise, DUCO offers the ultimate guarantee of a healthy and comfortable indoor climate. The occupant's health is,

therefore, central to DUCO. A well-thought-out combination of basic ventilation, mechanical extraction, purge ventilation and solar shading ensures optimum air quality. DUCO provides an innovative solution for residential buildings, offices, schools or care centres where everyone feels at home.

A SOLUTION FOR EVERY SITUATION

→ Any building situation

DUCO has a wide range of natural air intake grilles for **both new buildings and refurbishment projects**. Depending on the type of grille, Duco offers the following options:

→ Finish

Each type of grille is available in any colour: **F1***, every RAL colour, textured paint, special paints/lacquers, etc. Every type of grille is lacquered as standard in **SeaSide** grade. In addition, every type of grille in this brochure complies with the **Qualicoat** or **Qualanod** quality specifications.

* Except DucoGrille Transfer Acoustic

→ Vandalism and intrusion security

Solid louvre blades are very sturdy and **'vandal-proof'**. The DucoGrille Solid++ is **burglar resistant up to class 2**, in accordance with the European standard.

→ Penetration security

DucoGrille Classic louvre grilles with **V-blades** are penetration-proof.

→ Sound absorption

DucoGrille **Acoustic** louvre blades are fitted on the inside with non-combustible mineral wool and are ideally suited for applications with high levels of noise intrusion.

→ Insect screen and vermin screen

With DucoGrille Solid louvre grilles with small punching (P1), the **perforated louvre blades** act as an insect screen. With all other types* (Solid P2, Classic, Acoustic and Close 35Z), **2.3 x 2.3 mm stainless-steel mesh** is provided as standard. 6 x 6 mm or 20 x 20 mm mesh can be selected as an option.

P1

P2

Stainless-steel mesh

* Duco Acoustic Panel, DucoGrille Close 105 and DucoGrille Transfer do not have standard insect screening.

→ Ventilation capacity

Each louvre is extensively tested and optimised by DUCO's R&D department. Many 'High Performance' HP louvre blades in the DucoGrille Classic range ensure excellent airflow thanks to low resistance.

Air flow performance class	Ce or Cd
1	≥ 0,4
2	0,3 - 0,399
3	0,2 - 0,299
4	≤ 0,199

DucoGrille Classic G 50HP

→ Water resistance

All DucoGrille louvre grilles have been tested by **BSRIA** in accordance with watertightness tests developed in collaboration with HEVAC. The test simulates 75 litres per hour rainfall at a wind speed of 13 metres per second. Based on the air speed in the louvre and the % of watertightness, the louvre is assigned a class.

EN13030

Class A	100 - 99 %
Class B	98,5 - 95 %
Class C	94,9 - 80 %
Class D	< 80 %

→ High Performance

HP

HP louvre grilles offer **high performance in terms of air passage or water resistance**, or in many cases a combination of both properties.

→ Custom building

The height and width of each grille* can be determined to the mm.

* With the exception of DucoGrille Acoustic 150, DucoGrille Close 35Z and DucoGrille Transfer.

→ STND and +OPT version

The technical values of our grilles have been tested in two ways:

STND = 'Standard'

This is the standard version.

+OPT = '+Options'

This is an optional version where the grille was tested in an installation situation of 300 mm and with (integrated) water gutter*.

The +OPT version will often bring better results in terms of water resistance. See each product page for all values per grille type.

* Depending on the type of grille

PRODUCT OVERVIEW

Ventilation capacity

— = at intake
— = at exhaust

The longer the bar, the more important the air flow.

Legend

Burglar resistant
The grille is (optionally) burglar resistant up to class 2

Water resistant
The louvre grille is water resistant to a high or very high degree

Sound absorption
Can be used in projects with light or heavy (+) noise exposure

High Performance
The louvres are optimised for high performance

Fall-through protection

Vandal-proof

DucoGrille Solid 30Z

DucoGrille Solid 30Z louvre blades offer high ventilation capacity with relatively small louvre blades. The 'stackable' louvre blades form a single screen, making them **extra strong** and **vandal-proof**.

The louvre blades are available with **small punching (P1)**, **large punching (P2)** or as **false louvres (NP)** and provide a uniform façade design when combined in a single project.

DucoGrille Solid 30Z grilles comply with the BS6180 standard (class X or XI) for **fall-through protection** (except MR30Z and Solid ISO). See page 46-47 for more information.

Round version: MR 30Z

The **DucoGrille Solid MR 30Z** is a round surface mounted wall louvre.

DIMENSIONS

	MR 30Z
Frame depth	35 mm
Min. / max. dimensions	min. dia. 300 mm max. Ø 1500 mm

Stainless-steel mesh is not available for round louvre grilles. All other dimensions and properties are the same as for the DucoGrille Solid M 30Z.

MR 30Z
Surface mounted wall louvre

Fall-through protection

Burglar resistant up to class 2

DucoGrille Solid++ 30Z

The DucoGrille Solid++ 30Z uses the same louvre blades as the Solid 30Z (P1 only), but with a **reinforced frame section**. This makes the louvre grilles **burglar resistant up to Class 2**, in accordance with the European standard.

DucoGrille Solid++ G 30Z grilles comply with class 5 of EN13049 for **impact protection**. DucoGrille Solid++ 30Z grilles meet the BS6180 standard (class X or XI) for **fall-through protection**. See page 46-47 for all classes per country.

++ G 30Z

Recessed wall louvre with flange

++ M 30Z

Surface mounted louvre grille for fitting on a frame

SPECIFICATIONS

The DucoGrille Solid++ 30Z is only available with P1 louvre blades. All specifications relating to ventilation capacity, water resistance and insect resistance are identical to the DucoGrille Solid 30Z P1 (see page 8).

P1

DucoGrille **Solid++ G 30Z** has passed all the tests prescribed in the 'Burglar resistance Construction products' prEN 1627 to prEN 1630 draft standards for class 2 intrusion resistance.

DucoGrille **Solid++ M 30Z** complies with standards NEN 5096:2007 and EN 1627:2011

The complete test report is obtainable upon request:
G 30Z: DE 651 XG 815 - CAR 8175 | **M 30Z:** SKG12.1036

Also available in **RC2 intrusion-resistant** version

DucoGrille Solid ISO 30Z

The DucoGrille Solid ISO 30Z is an architectural and **thermally insulated window louvre**. The window louvre can be connected to both round and rectangular air ducts. Available as an option with reinforced frame section for burglary-resistance up to class 2 (only with P1 blades).

DIMENSIONS AND SPECIFICATIONS

Frame depth	88 mm (with thermal break)
Flange width	24 / 28 / 32 / 36 / 40 / 44 / 48 mm
Duct connection	Round or rectangular, any dimension
Grille dimensions	Louvre grille height = duct height + 2 x 63 mm min. Grille width = duct width + 2 x 63 mm min. Min. W 300 x H 300 mm Max. 2900 mm high / wide if other dimension < 1250 mm
U-value	0.9 W/m ² K

→ Rear for **round** duct

→ Rear for **rectangular** duct

SPECIFICATIONS

The DucoGrille Solid ISO 30Z is available with P1 and P2 louvre blades. All specifications relating to ventilation capacity and water resistance are identical to the corresponding DucoGrille Solid 30Z models (see page 8).

Fall-through protection

Impact protection

DucoGrille

Solid G 30Z Barrier Load

The DucoGrille Solid 30Z Barrier Load is ideally suited for high-rise applications such as student housing, retail and commercial buildings.

It meets the highest standards in **fall-through protection** and **impact protection** (see page 46-47 for more info).

Fall-through protection standards:

- B03-004: Class C4
- NEN EN1991-1-1: A/B/F/G
- NF P01-013: A/B (Width < 600 mm)
- BS6180: XI

Impact protection standards:

- EN13049: Class 5
- NF P08-302: H2/C2

Furthermore, the DucoGrille Solid 30Z Barrier Load offers the same benefits for purge ventilation as the DucoGrille Solid G 30Z (see page 8).

G 30Z
Barrier Load

Fall-through protection

Impact protection

Duco Barrier Load Louvre

Barrier Load Louvres have several advantages, such as fall through protection for open windows at great heights and intensive ventilation of the rooms inside the building. At the same time, the louvre blades provide solar shading while blocking out the sun's rays and heat without loss of daylight. In addition to these functions, DUCO Barrier Load Louvres also provide an architectural aspect to the façade. This type of louvres is widely used in student housing, but can be adapted to any project.

It meets the highest standards in **fall-through protection** and **impact protection** (see page 46-47 for more info).

Fall-through protection standards:

- B03-004: Class A/B/C4/D
- EN1991-1-1: Class A/B/C4/D
- BS6180: XI

Impact protection standards:

- EN13049: Class 5
- NF P08-302:
 - Louvre blade angle 3°: Class Q4
 - Louvre blade angle 45° and 55°: Class H2

High Performance

DucoGrille Classic 45HP

The DucoGrille Classic 45HP combines **excellent air flow** with a **“Z”-shaped louvre blade** for a sleek design. As a result, the DucoGrille Classic 45HP can be used for purge ventilation in projects with specific aesthetic requirements. All types are manufactured from extruded aluminium sections. Insect mesh is fitted as standard.

Suitable for high noise levels

DucoGrille Acoustic 150

The DucoGrille Acoustic G150 / N150 is a sound absorbing recessed wall louvre manufactured from extruded aluminium sections. The louvre blades have **sound-absorbing, non-combustible mineral wool** inside. Thanks to its heavy-duty construction, the DucoGrille Acoustic G150 / N150 has a **high attenuation value plus a low resistance factor** (and consequently better flow rates).

Fall-through protection

Impact protection

Suitable for high noise levels

Duco **Acoustic Panel**

Duco Acoustic Panel is a sound absorbing recessed mounted wall louvre, manufactured from extruded aluminium sections. It is extremely suitable for housing and residential applications. The Acoustic 150 louvre blades feature sound-absorbing, non-combustible mineral wool and provide an **excellent sound reduction index**. This custom-made module is available in two variants: **Acoustic Panel 150** and **Acoustic Panel 300** for very high noise exposure. With its double row of louvre blades, the Duco Acoustic Panel 300 offers a **sound reduction index $R_w (C;Ctr)$ of no less than 17 (-1;-4) dB**.

Duco Acoustic Panel grilles meet the BS6180 standard (class XI) for **fall-through protection** and class 5 of EN13049 for **impact protection**. See page 46-47 for more information.

In both
CONVENTIONAL
and **CURTAIN**
WALLS

DucoGrille Close 105

The DucoGrille Close 105 is a **motorised multileaf damper** with large air passage, tailor-made for offices and schools. The multileaf damper can be used both as a supply and exhaust grille. In the first case, the DucoGrille Close 105 can be built into a **wall or curtain wall** and a wall louvre on both sides, which may or may not be burglar resistant, ensures an aesthetic finish. With a limited depth of just 105 mm, the multileaf damper can easily be installed in smaller rooms, both horizontally and vertically.

Moreover, the multileaf damper can also serve as an **adjustable central exhaust unit**, for example in combination with DUCO's roof turrets. Thanks to the high airflow rate, the DucoGrille Close 105 is also ideal for use in providing intensive ventilation or as part of the **(night) cooling systems** of a building.

The DucoGrille Close 105 can be fitted with **different types of motor** (including **Spring Return** motors as well).

→ DucoGrille Close 105 louvers in closed position

→ DucoGrille Close 105 possibility of recessed curtain wall

OR
MOTORISED

DucoGrille Close 35Z

DucoGrille Close G 35Z and N 35Z are closable recessed wall louvres manufactured from extruded aluminium sections. The DucoGrille Close is also available as a closable window louvre (F 35Z), ideal when using Night Cooling. The unique “Z”-shaped louvre blades provide adjustable ventilation via manual or electric operation.

→ Manual stepless operation: left, centre or right of the grille, as preferred

DucoGrille Close M 100

DucoGrille Close M 100 is a closable surface mounted internal louvre grille manufactured from extruded aluminium sections. The plastic slides provide **adjustable ventilation**. The DucoGrille Close M 100 is available as standard with heights of 200 or 300 mm and the width can vary up to a maximum of 1,000 mm.

DIMENSIONS

Frame depth	13 mm
Height of the grille	200 or 300 mm
Width of the grille	max.: 1000 mm

M 100
Surface mounted wall louvre

DucoGrille NightVent

The DucoGrille NightVent is a **glass-replacing ventilation hatch** that provides efficient cooling of any building thanks to the supply of **large ventilation flow rates**.

The ventilation hatch consists of **a single module**, although it contains two essential components. From outside, the DucoGrille NightVent is protected by a window louvre with perforated louvre blades (**DucoGrille Solid 30Z P1**) that act as an insect screen. On the inside, **an insulated opening panel** with a flat-finished inner panel makes for easy integration into the interior. In addition, the **acoustic attenuation** ensures that the thermal value of the ventilation hatch is comparable to that of a closed window.

The ventilation hatch can be **hinged horizontally or vertically**. The inner and outer panels can be finished in various colours. DucoGrille NightVent is available in **motorised and manual versions**.

The DucoGrille NightVent has been tested under the applicable European regulations by means of intensive tests covering wind and water resistance. In addition, the external louvre grille is also available in a vandal-proof or burglary-resistant version **up to RC2 class**.

INSECT SCREEN

Fine punching keeps insects out. Stainless steel mesh can be fitted as an option.

DIMENSIONS AND SPECIFICATIONS

Motorised

Manual

Louvre pitch	37,5 mm	
Flange width	24 / 28 / 32 / 36 / 40 / 44 / 48	
Frame depth	115 mm	
Airflow	369 l/s/m ² at 2 Pa	
Air density (when closed)	Qn50 = 4,5 m ³ /h/m ²	
Water resistance (when closed)	Class 9a (EN 12208-EN1027)	
Attenuation value 	Rw open position [C;Ctr] = 10 [0,-1] dB Rw closed position [C;Ctr] = 33 [-1,-4] dB	
Insulation value	U = 1.5 W/m ² K	
Motor noise	< 35 dB (A)	n/a
Operating temperature	-25 °C up to +60 °C	n/a
Min. / max. dimensions	see tables on p. 40	
Operation		

If a motorised system is chosen, a remote control can open / close the ventilation hatch, alternatively the ventilation hatch can be linked to the building management system (BMS).

With the manual version, the ventilation hatch is fitted with one or two handles.

→ Inside view

→ Outside view

BURGLAR RESISTANT

The DucoGrille NightVent is vandal-proof and can optionally be burglar resistant up to RC2 class (according to NEN 5096:2012 & EN 1627:2011).

→ Dimensions & order information: see page 51
→ Full specifications: see page 52

DucoGrille **NightVent**

Ceratec | Comines-Warneton (Belgium)

Duco **Roof Turret Solid 30Z**

Duco Roof Turret Solid 30Z is an aluminium roof cowl. It provides aesthetic concealment of air vents. The roof cowl also ensures adequate **purge ventilation** of the screened areas and can be used in almost **all projects**. The perforated Solid 30Z louvre blades are the ideal solution for both insect resistance and ventilation capacity. Thanks to the large punching (P2), this **small roof cowl** achieves **high ventilation values**. The roof turrets are **made to measure** and provided with a sill at the bottom and a cover plate on top.

DIMENSIONS

Louvre pitch	37,5 mm
Roof turret length	Min. 200 mm - Max. 2630 mm (to be coupled)
Roof turret width	Min. 200 mm - Max. 1180 mm (to be coupled)
Roof turret height	Min. 255 mm - max. 1600 mm

VENTILATION VALUES

2 m/s	D	D	C
2,5 m/s	D	D	C

Sill profile

The **Duco Roof Turret Solid 30Z** also exists as a variant with sill profile. The sill profile ensures **better water drainage**. The sill profile allows the roof covering to be completely concealed. This provides an **aesthetic finish**. It also offers more placement options.

OPTIONS DUCO ROOF TURRET SOLID 30Z

DucoGrille Close 105

The DucoGrille Close 105 can, as an option, be integrated in the roof turret, thereby ensuring a controlled air supply or extraction. More information about the DucoGrille Close 105 can be found on page 34.

Eggcrate grille

The Duco Roof Turret Solid 30Z is available with an optional Eggcrate grille, which provides even better water resistance (combination with the P2 louvre blades).

VENTILATIVE COOLING

'Free cooling' by means of purge ventilation

Airtight construction and good insulation not only result in lower heat demand, they also increase the demand for **cooling in a building**. Certainly during the warmer (summer) months, the indoor temperature can rise quickly. **Summer comfort** is therefore increasingly being included in the design requirements of buildings.

This is because by using **high flow rates** of outside air (purge ventilation), a building can achieve optimum cooling using ventilative cooling (free cooling). That means **without air conditioning** or other artificial means, provided one or two guidelines are followed:

- A** Always use ventilative cooling combined with **good exterior solar shading**.
- B** When designing the building, allow for **sufficient thermal mass** in the building to store the cooling effects of the outside air.
- C** Use the **correct pressure drop** when sizing the supply grilles.

DucoGrille **NightVent**

DucoGrille **Close 105**

DUCO'S SOLUTIONS

DUCO's extensive range of (controlled) wall and window louvres, louvre walls and exterior solar shading are excellent aids within the overall ventilative cooling strategy. Contact your DUCO adviser for more information. We will gladly provide you with tailored advice!

IMPACT AND FALL-THROUGH PROTECTION

Façade elements are increasingly expected to meet 'impact protection' and 'fall-through protection' requirements:

Impact protection

The resistance of a material to which an intense force or shock is exerted for a short period of time.

Fall-through protection

The load applied to resist penetration that prevents people from falling through this barrier.

Note: often a specific mounting method applies or the test is only valid for specific versions (e.g. a certain step, a certain maximum span ...).

Contact DUCO for more information. Full test reports can be requested from DUCO.

Overview of results

DUCO products achieve very good results in terms of impact and fall-through protection:

	Impact protection		Fall-through protection

SERVICE PLEASE!

To provide the best support for your project, you will find **sectional drawings, technical data sheets, specification texts** and **assembly instructions** on our **website: www.duco.eu**.

Find out what else DUCO can do for you.

Calculating air flow → airflowcalculation.duco.eu

Calculate the required air flow rates, area or pressure differences for each type of louvre grille with this handy online tool.

BIM library → www.duco.eu/bim

All products in this library are freely available in Autodesk Revit.

Specification texts → You will find specification texts for all products on our website www.duco.eu.

TAILORED **ADVICE**

DUCO offers tailored expertise & services for specifiers, and has a dedicated unit to advise and support architects, engineering offices and consultancies. DUCO works with reputable organisations such as the WTCB, the Von Karman Institute, etc. DUCO's knowledge and years of experience enable an appropriate solution to be offered for each of your projects.

Any questions? Please contact us at info@duco.eu or call 0333 112 1134 for tailored advice!
