

TECHNICAL DATA SHEET

CO₂ Room sensor without control

Optional component within DUCO's demand-controlled ventilation systems.

The CO₂ Sensor without control measures both CO₂ content (an indicator of indoor climate) and the temperature in the living spaces, thus controlling the ventilation system. The CO₂ room sensor without control is powered by 230VAC or 24VDC and communicates wirelessly ("RF") or wired ("Wired").

Physical characteristics

Item number + colour	0000-4636 (Black) 0000-4637 (White)
Width x Height x Depth (mm)	69 x 69 x 55.5 (excl. cover plate) 83 x 83 x 55.5 (incl. cover plate)
Weight	182 grams
Material	Polycarbonate-ABS
Display	1 RGB LED
Operation	none
Suitable for use with	DucoBox Silent (Connect) (FR) DucoBox Focus / DucoBox Hygro Plus DucoBox Energy

Electrical characteristics

Power supply + communication	230VAC > wireless ("RF") 24VDC > Wired
Peak power	1,8 W
CO₂ range	300 - 2000 ppm
CO₂ accuracy	40 ppm +/- 5%
Reverse polarity protection	Graetz bridge
IP class	IP31

Operating conditions

Temperature	0°C - 40°C
Humidity	Not water-resistant

RF-WIRED / 230VAC - 24VDC
